

**A GUIDE TO**

**MONSTER**

**KILLING**

**BY**

**BEOWULF**

## WEAPONRY

*It is vitally important to have the right weapons if you are to succeed in slaying a dragon or cutting the skull of a goblin you need to: use flint to sharpen it; water from the pixie king; if it breaks, get some shavings from the king of the underworld then go to a blacksmith.*

## ARMOUR

*Make sure the armour is well fitted and at least 5 mm thick with weight of 0.5.0 stone. When washed use fresh spring water to clean the armour thoroughly and to finish cleaning you need to rub it with deer skin and oil it with animal fat. It must be stored in a chest with a dragon skin blanket on top.*

# STRATEGY

*There are four ways of attack, stealth, surprise, speed and ambush:*

*Ambush means attack with an army of men; speed means you need to be fast and able to move weaponry fast; surprise means hide with an army and attack one by one and stealth you need to be speedy, silent and swift.*

# BEASTS YOU MAY ENCOUNTER

*You may encounter a: swamp hag from the depth of the murky deep; a ten headed devil dog from the world beneath our feet; a dragon from the devils cave ; a monster known as Grendel and many more.*

## TAKING CARE OF YOURSELF

*If you are wounded, take two or three doc leaves and make a bandage, add one drop of water every hour to heal. Make sure you have a good night sleep or you will be too tired to fight the next day. Make sure you train hard and get ready for the next battle.*

## HOW TO CHOOSE YOUR BATTLES AND SECURE YOUR REWARDS

*Some monsters aren't worth it and some kings are greedy so you need to be cautious about who you fight and who you trust. When you arrive ask the villagers about the king and what's been going on to find out if the king will give you your reward and what the monster is doing that shows whether you should stay or go.*
