

BEOBWULF'S
GUIDE TO
MONSTER
KILLING

Weaponry

It is important that your weapons are extremely sharp and deadly. But it is equally important that these weapons are in good condition; they should be clean from blood after each battle and they must have a good grip so it is easier to fight. Swords, knives and axes are the most important weapons as they have the highest qualities.

Armour

Armour must be easy to move in and flexible so it is more comfortable and easier to fight in. It is very important that the armour is strong and sturdy so that if you were to get hurt it would be less painful. Helmets and bodysuits are the most required bits of armour as a helmet will protect your head and a bodysuit will protect your body from getting smashed.

Preparing for battle

To be prepared for battle you will need to have the strength of ten men as that is the strength of the

Monster. As you may not succeed this time you will need to say some goodbyes to friends and family members. To keep strong and built you will need to have supplies of food and drink with you but make sure that grasping monster doesn't take it!

Strategy

The strategy you do must be thought about carefully whether it is hiding, surprise, ambush or stealth any of these are the best. It is important that you have a good sleep before the battle and really think about it.

Hiding- Hide in the bushes until she has turned around then start to kill.

Surprise- Make her surprised when you jump and don't let her see you.

Ambush- Make the right move at the right time and make sure you are in the right spot.

Stealth- Be silent before you start the battle.

Beasts you may encounter

There are many monsters around these days so you never know what you could come across but in this mighty battle you may encounter many appalling monsters like Swamp hags, ten headed dogs, Cackle back heads and Horseback man heads from the earth's core. Monsters have many weaknesses but these are the key strengths and weaknesses

	Strengths	Weaknesses
Ten headed dogs	speed jumping	shadows
Cackle back heads	big cackling	Strong
Horseback man heads	big strong ugly	other monsters
Sea Hags	big	sunlight

-

Taking care of yourself

Make sure that there is no danger anywhere around you and if so move and take the battle to a safer place to fight.

Once you are sure the monster is dead and it is not pretending to be dead you can start to kill the next monster but always remember its weaknesses and strengths.

How to choose your battles and secure your rewards

Some monsters aren't worth killing as they may not do as much harm as other monsters so make sure to kill the more fierce monsters first and then the others. Your rewards are safe and secure so once this horrendous battle is over you can receive your rewards.

Thank you for reading my monster slaying guide and I hope it has helped you.
