

**BEOWULF'S
GUIDE ON**

**HOW TO
SLAY A
MONSTER**

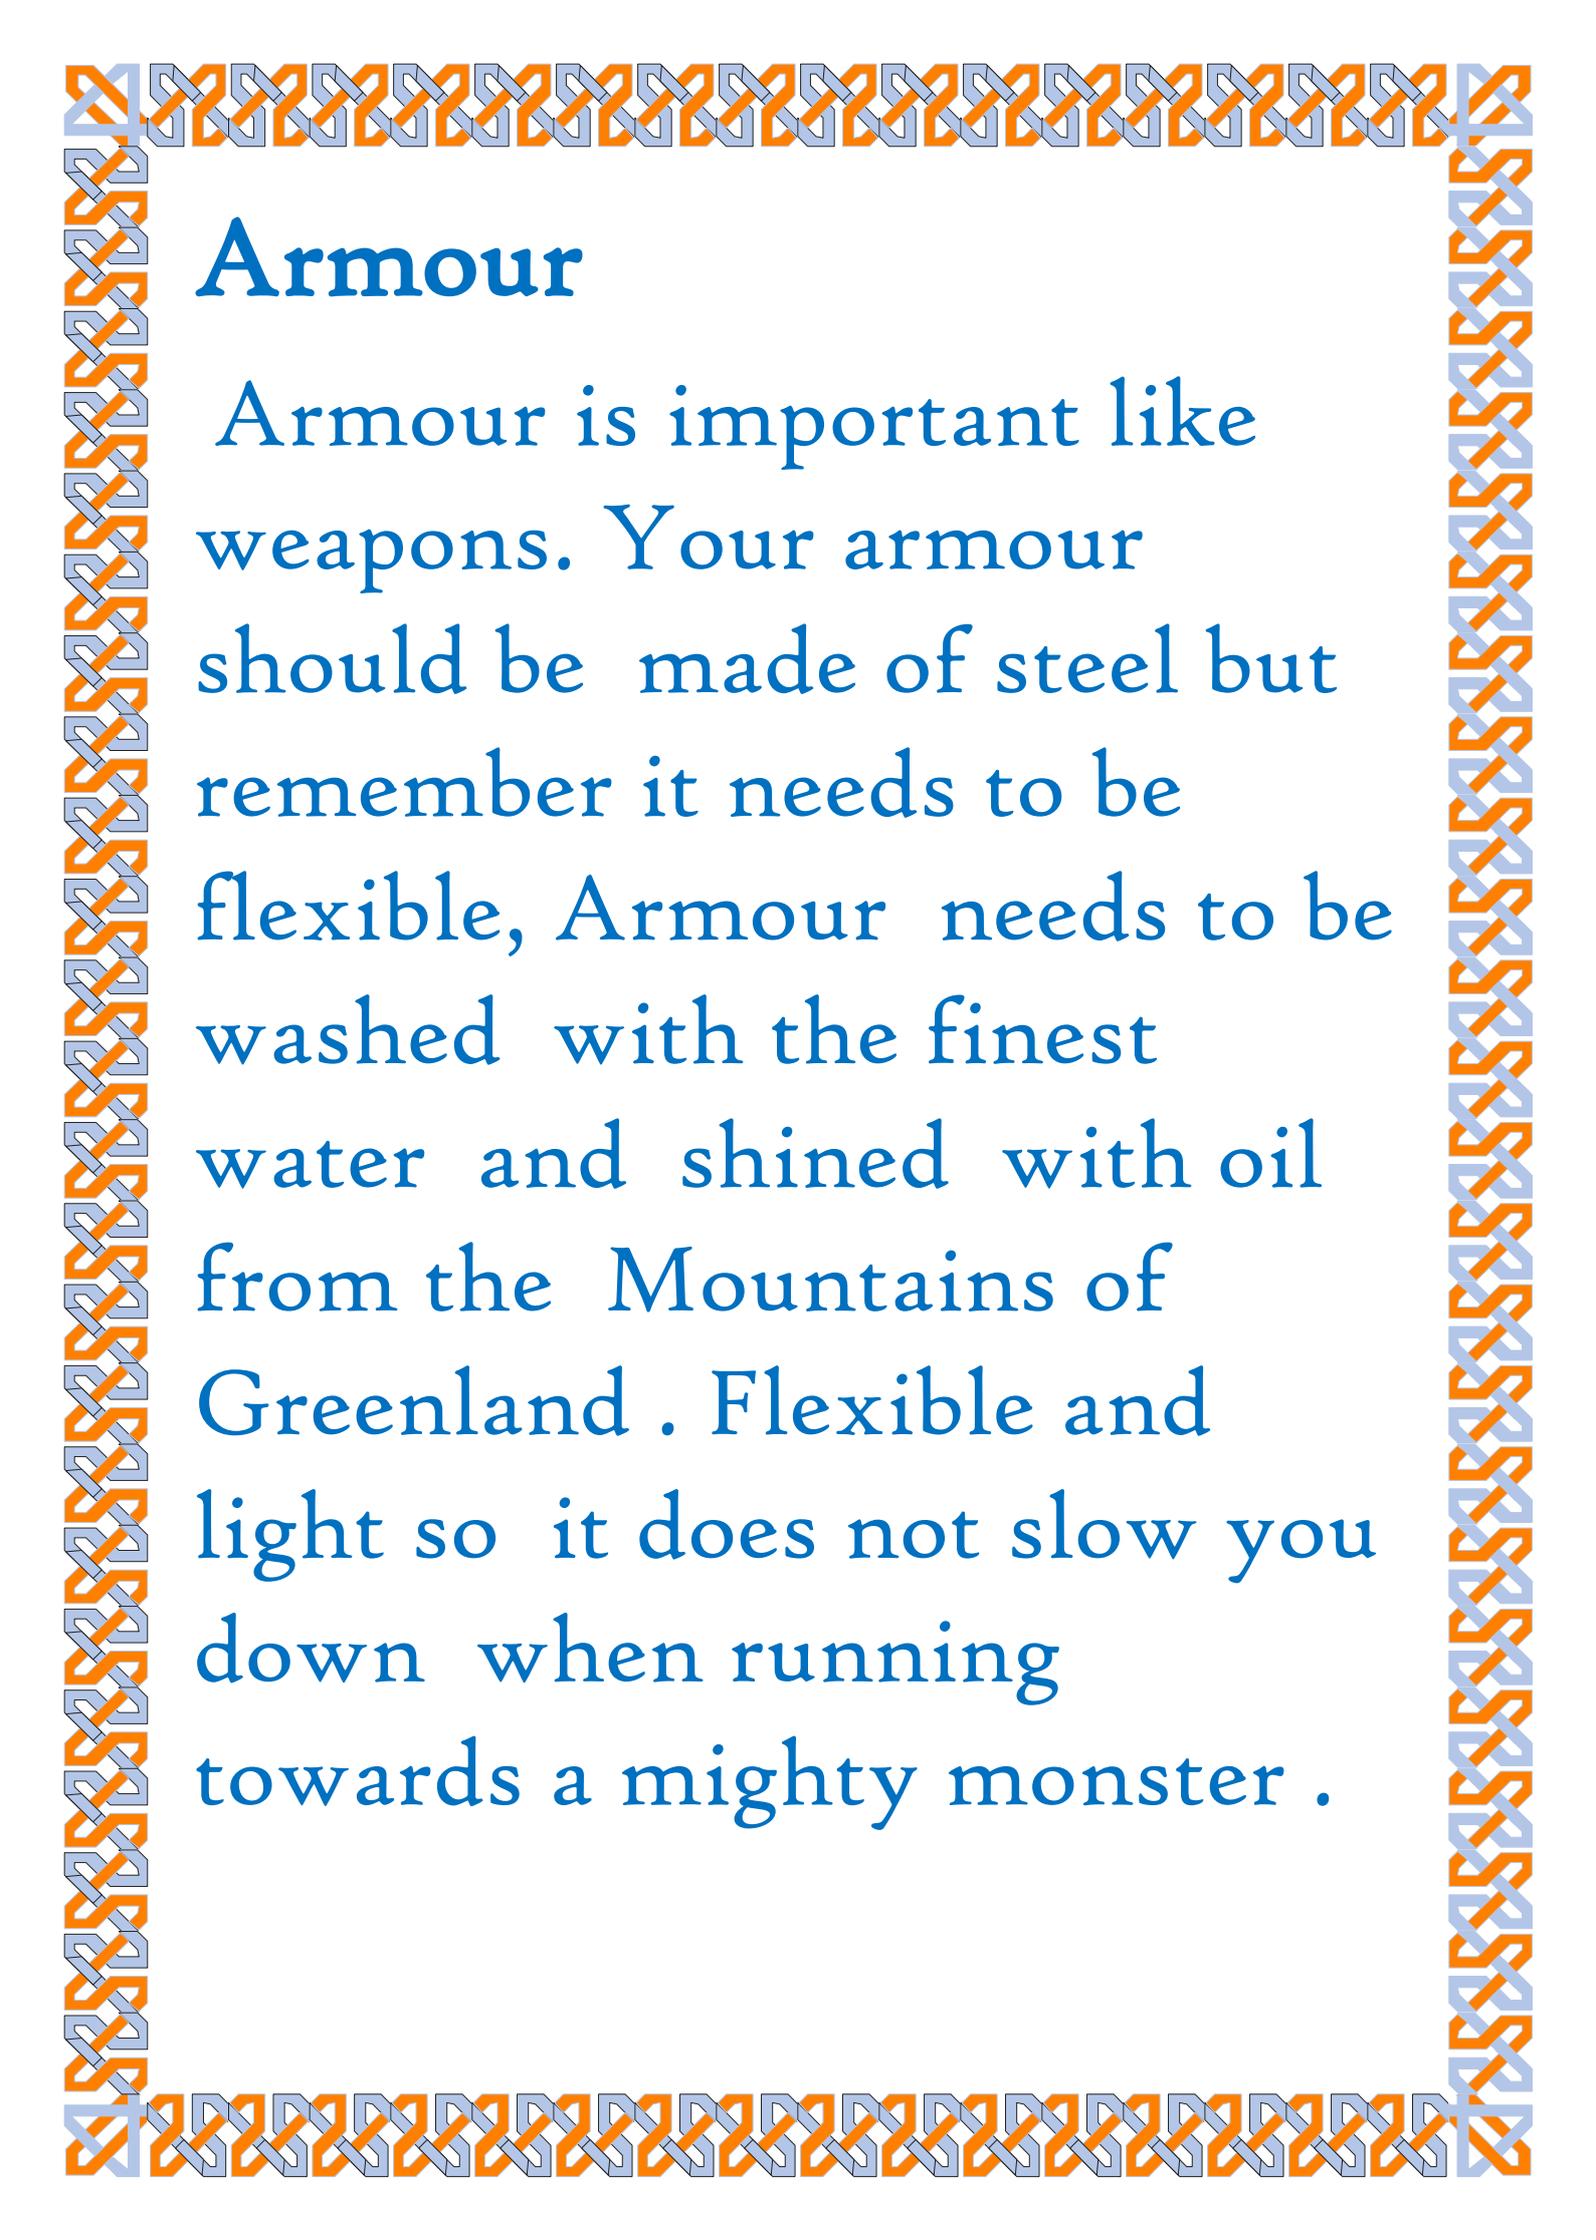

Weaponry

Your weaponry is very important when monster slaying, swords, knives and axes should be used and cleaned regularly.

Swords- should be made of the finest iron from the depths of earth made by gobbles. Between each kill sharpen your sword until the point is as sharp as a dragon's tooth.

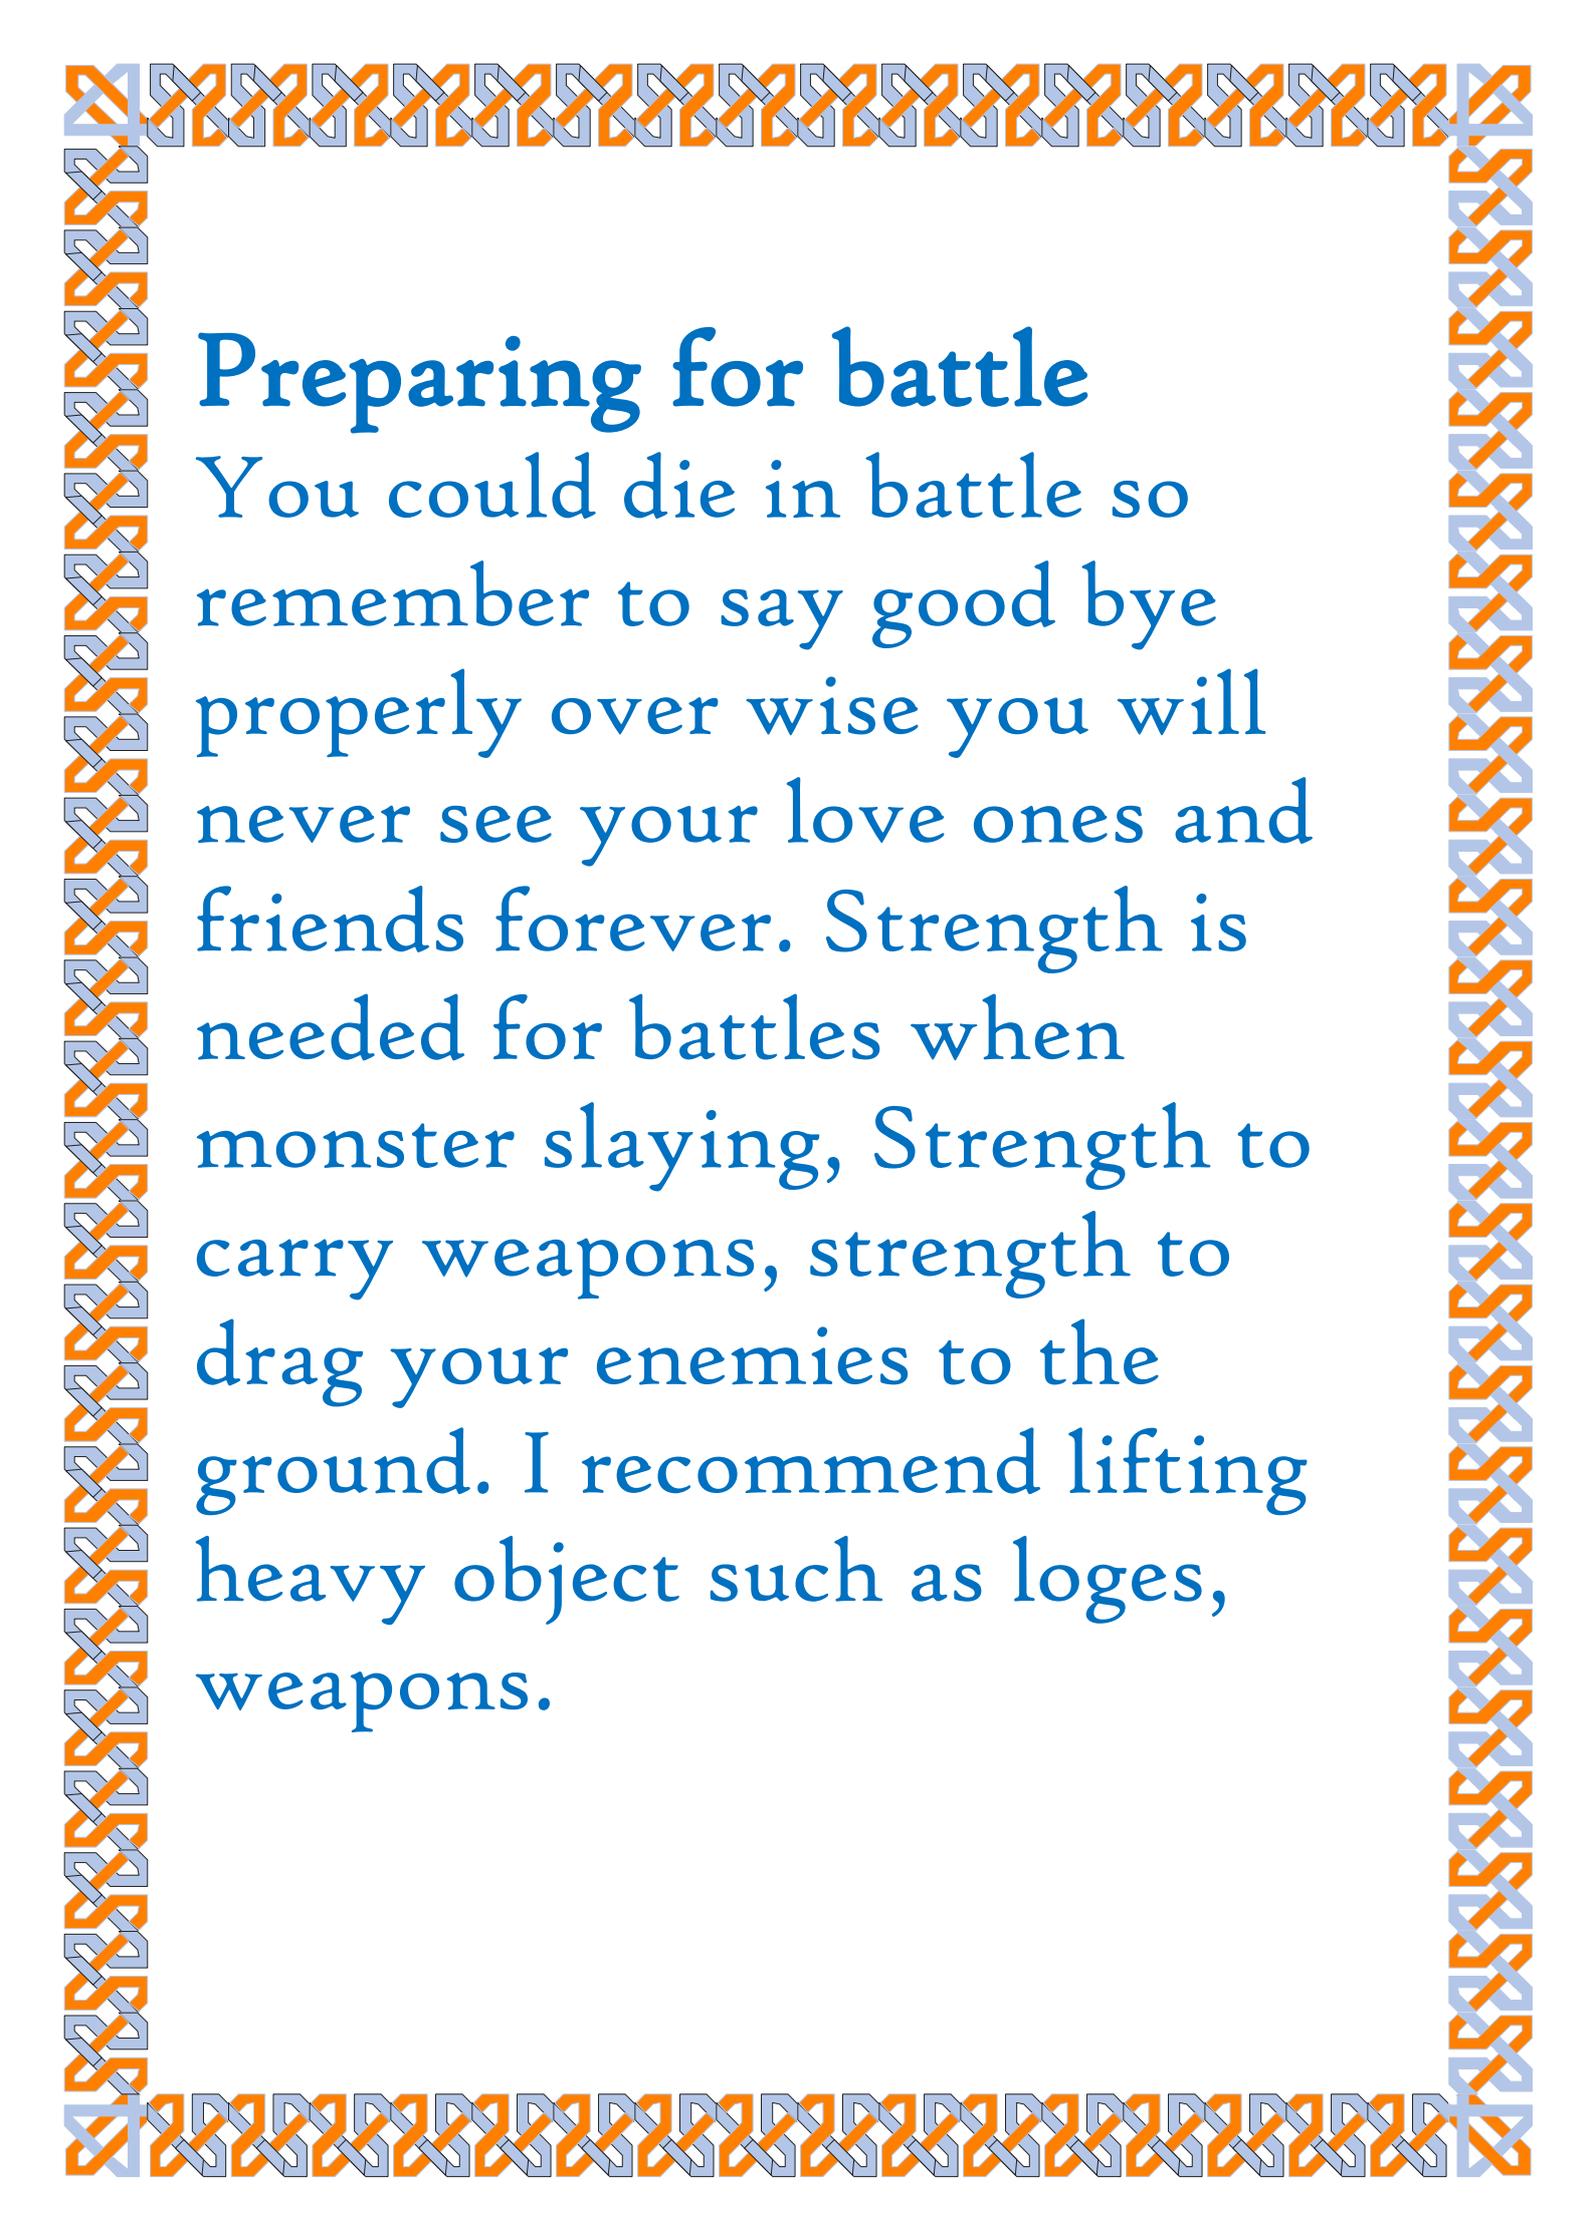

Spears- All so should be made of fine iron. You need to be strong and be able to throw and hit the vile monster.

Mace- Never TOUCH a mace as the spikes as you will seriously hurt yourself. You should push as hard as you can as all monsters have tough skin.

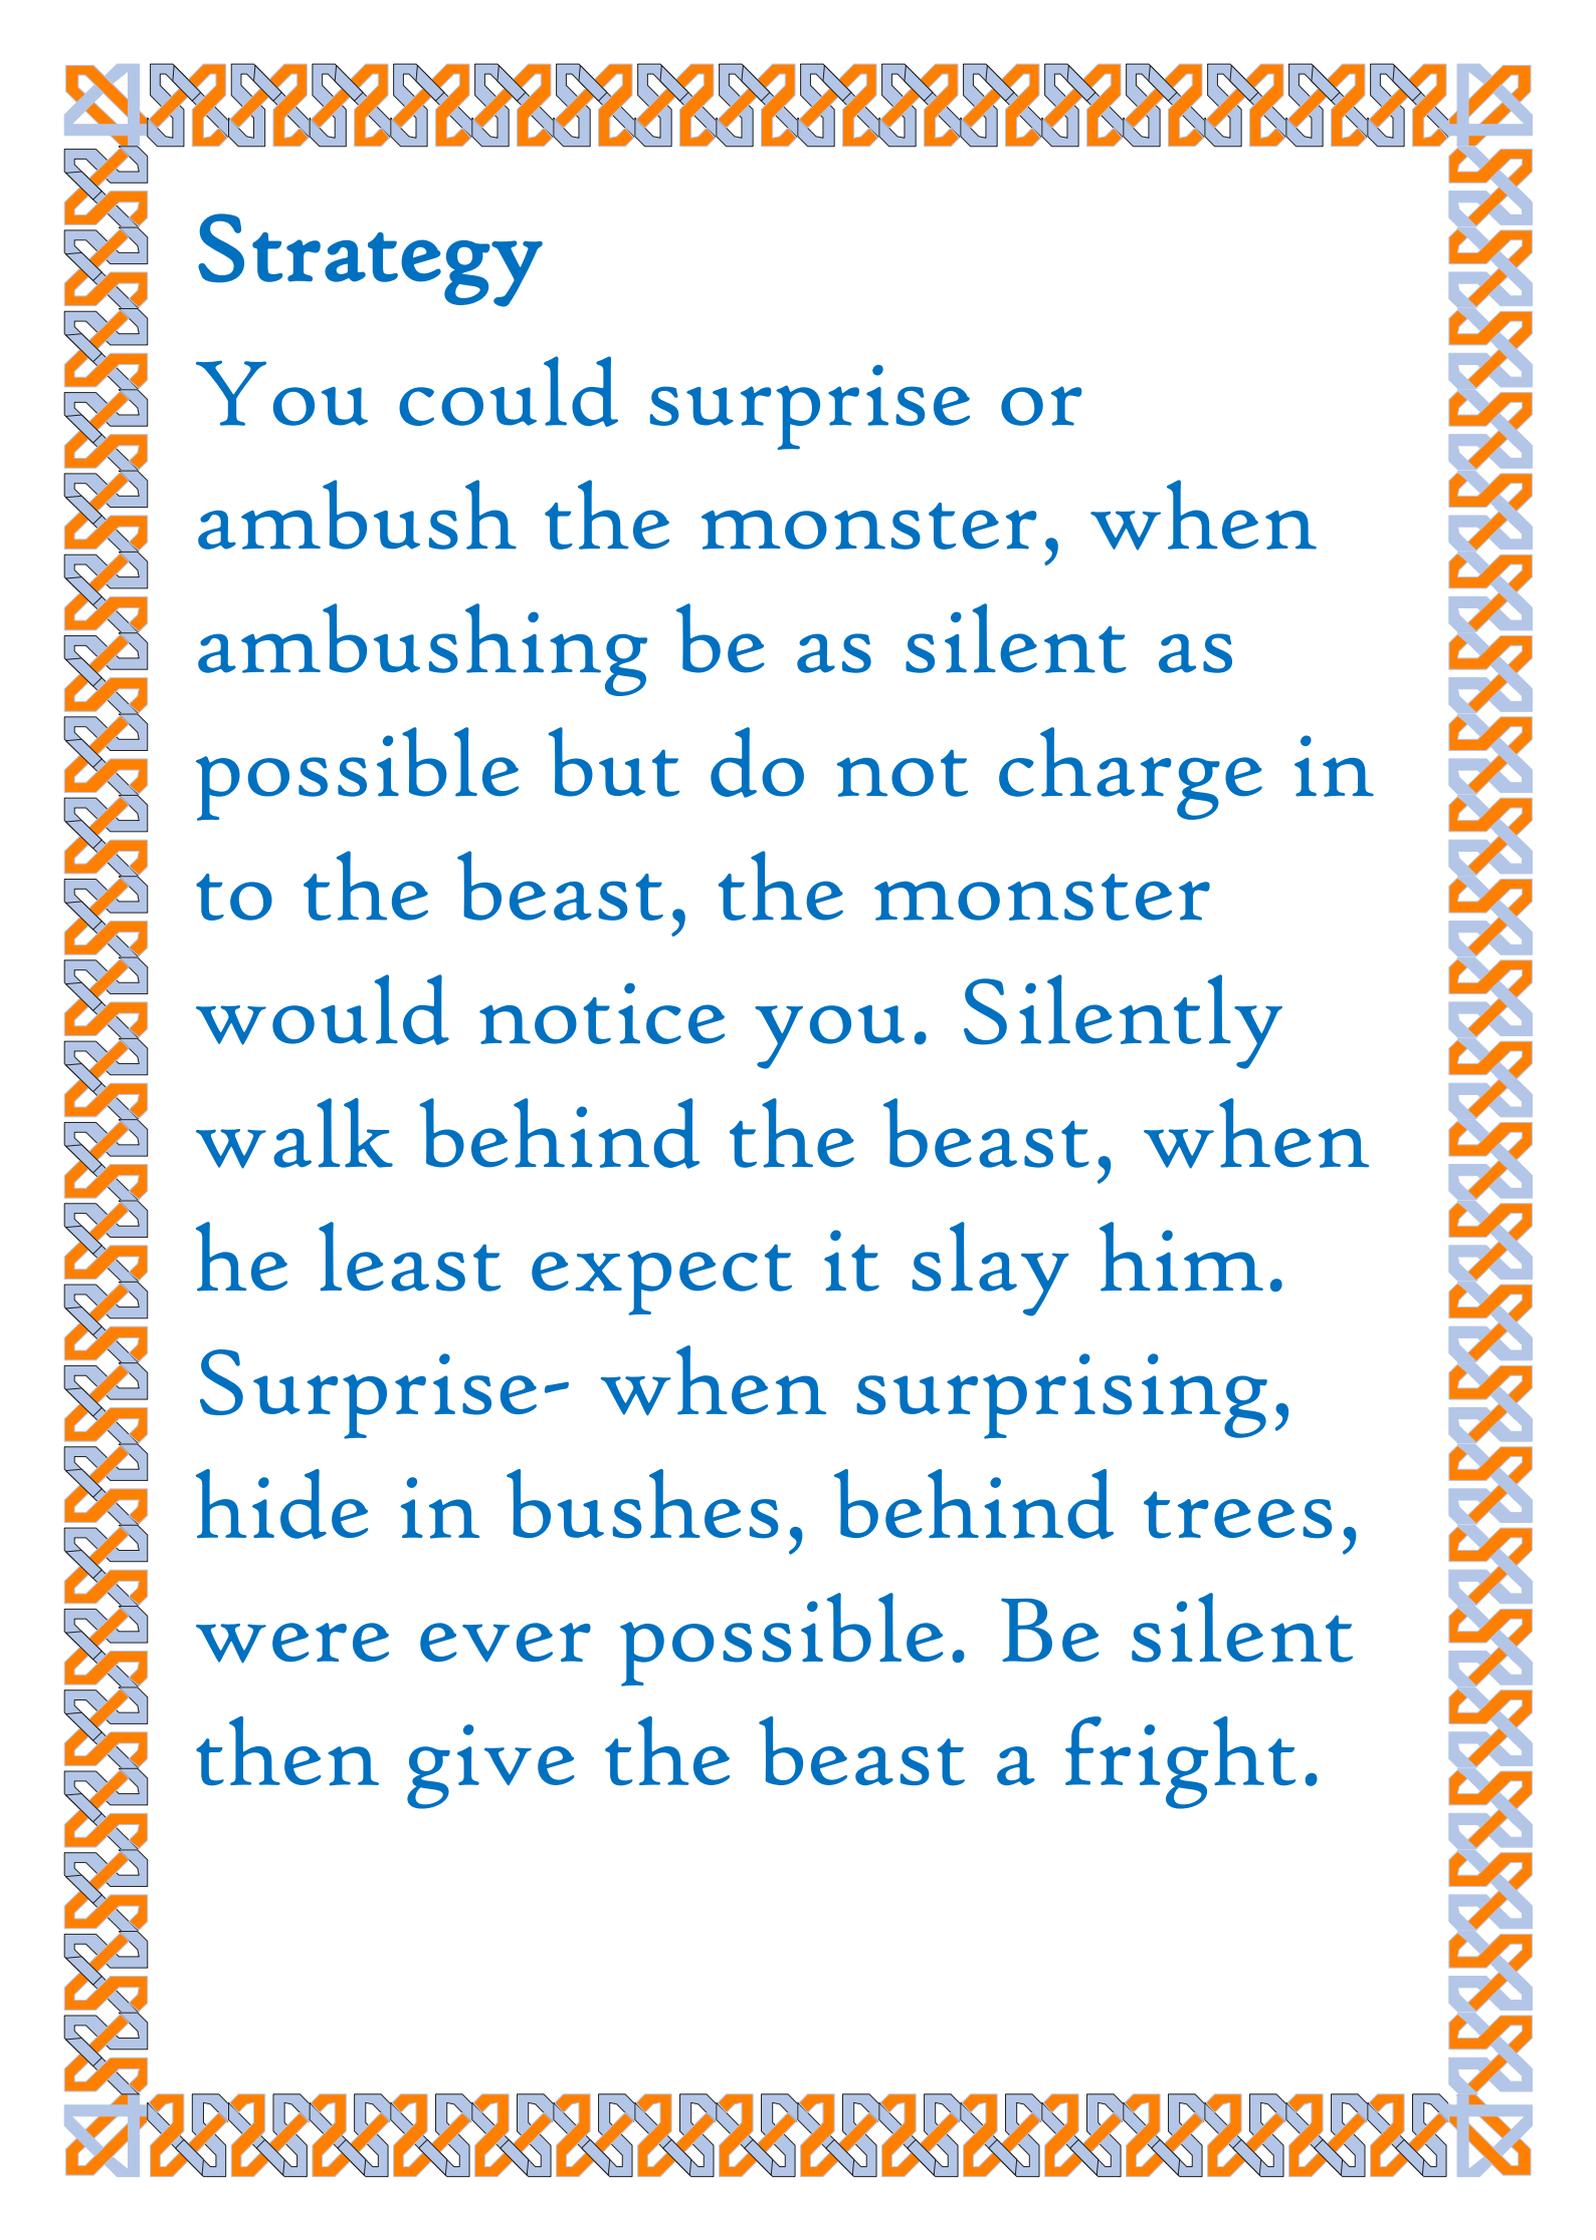

Armour

Armour is important like weapons. Your armour should be made of steel but remember it needs to be flexible, Armour needs to be washed with the finest water and shined with oil from the Mountains of Greenland . Flexible and light so it does not slow you down when running towards a mighty monster .

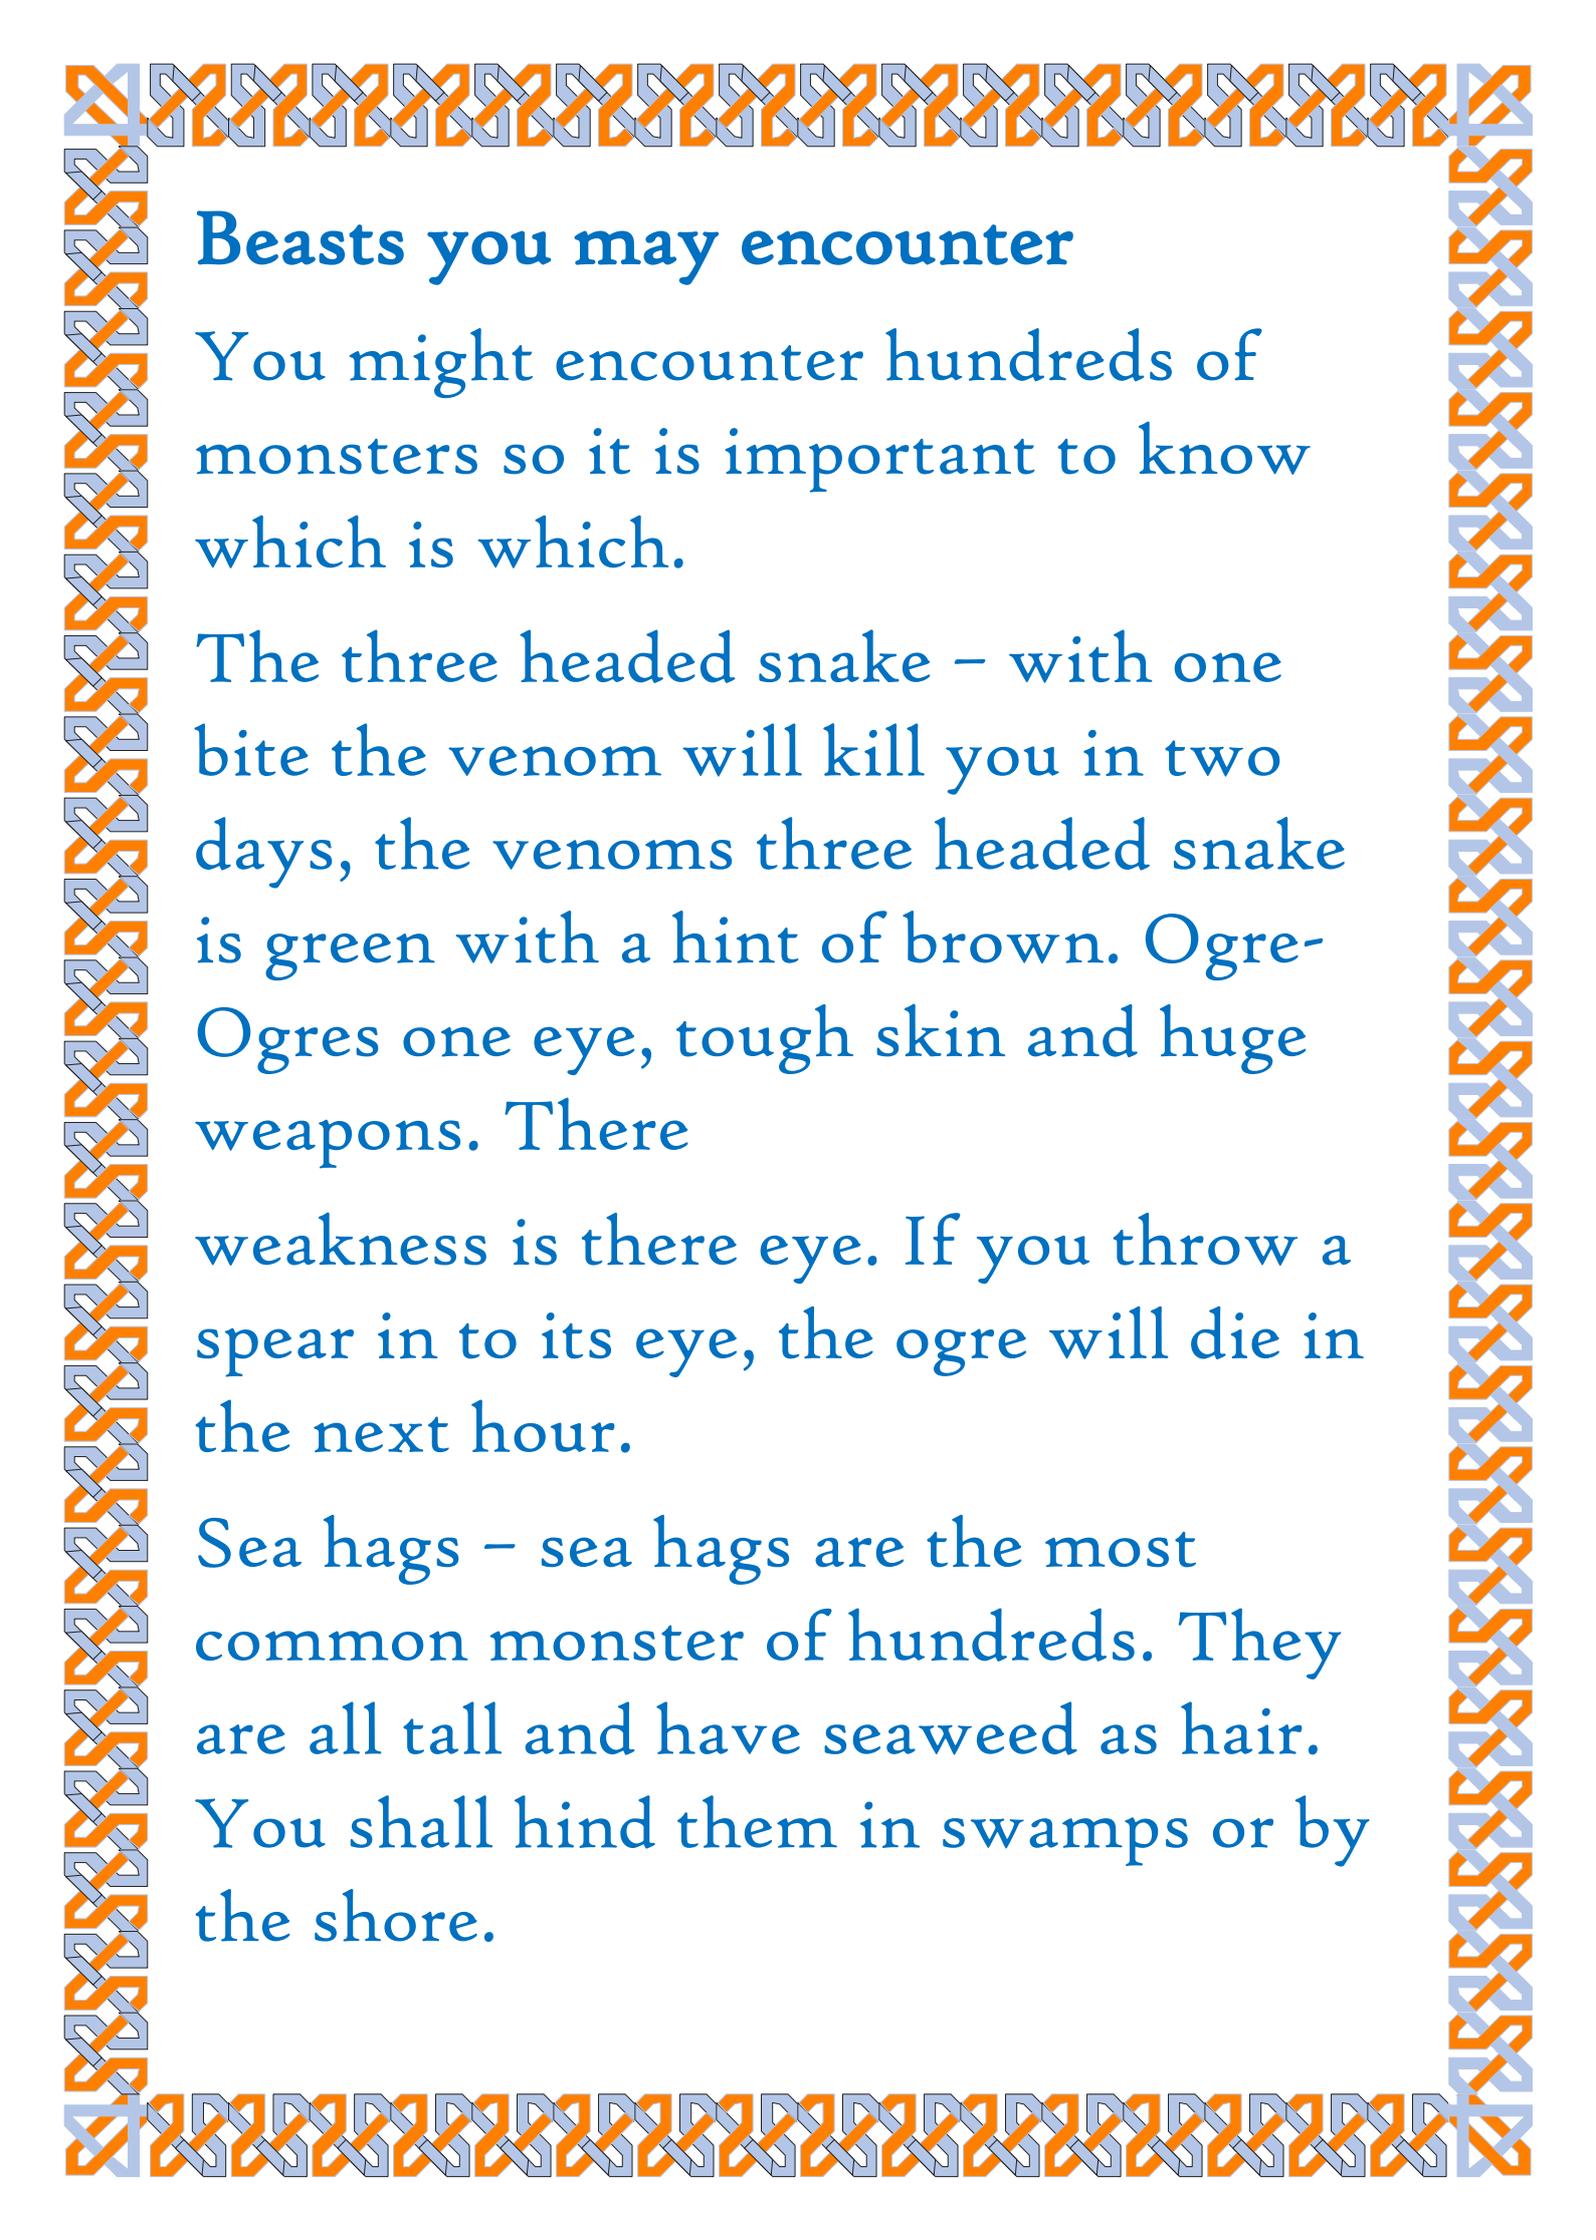

Preparing for battle

You could die in battle so remember to say good bye properly over wise you will never see your love ones and friends forever. Strength is needed for battles when monster slaying, Strength to carry weapons, strength to drag your enemies to the ground. I recommend lifting heavy object such as loges, weapons.

Strategy

You could surprise or ambush the monster, when ambushing be as silent as possible but do not charge in to the beast, the monster would notice you. Silently walk behind the beast, when he least expect it slay him. Surprise- when surprising, hide in bushes, behind trees, were ever possible. Be silent then give the beast a fright.

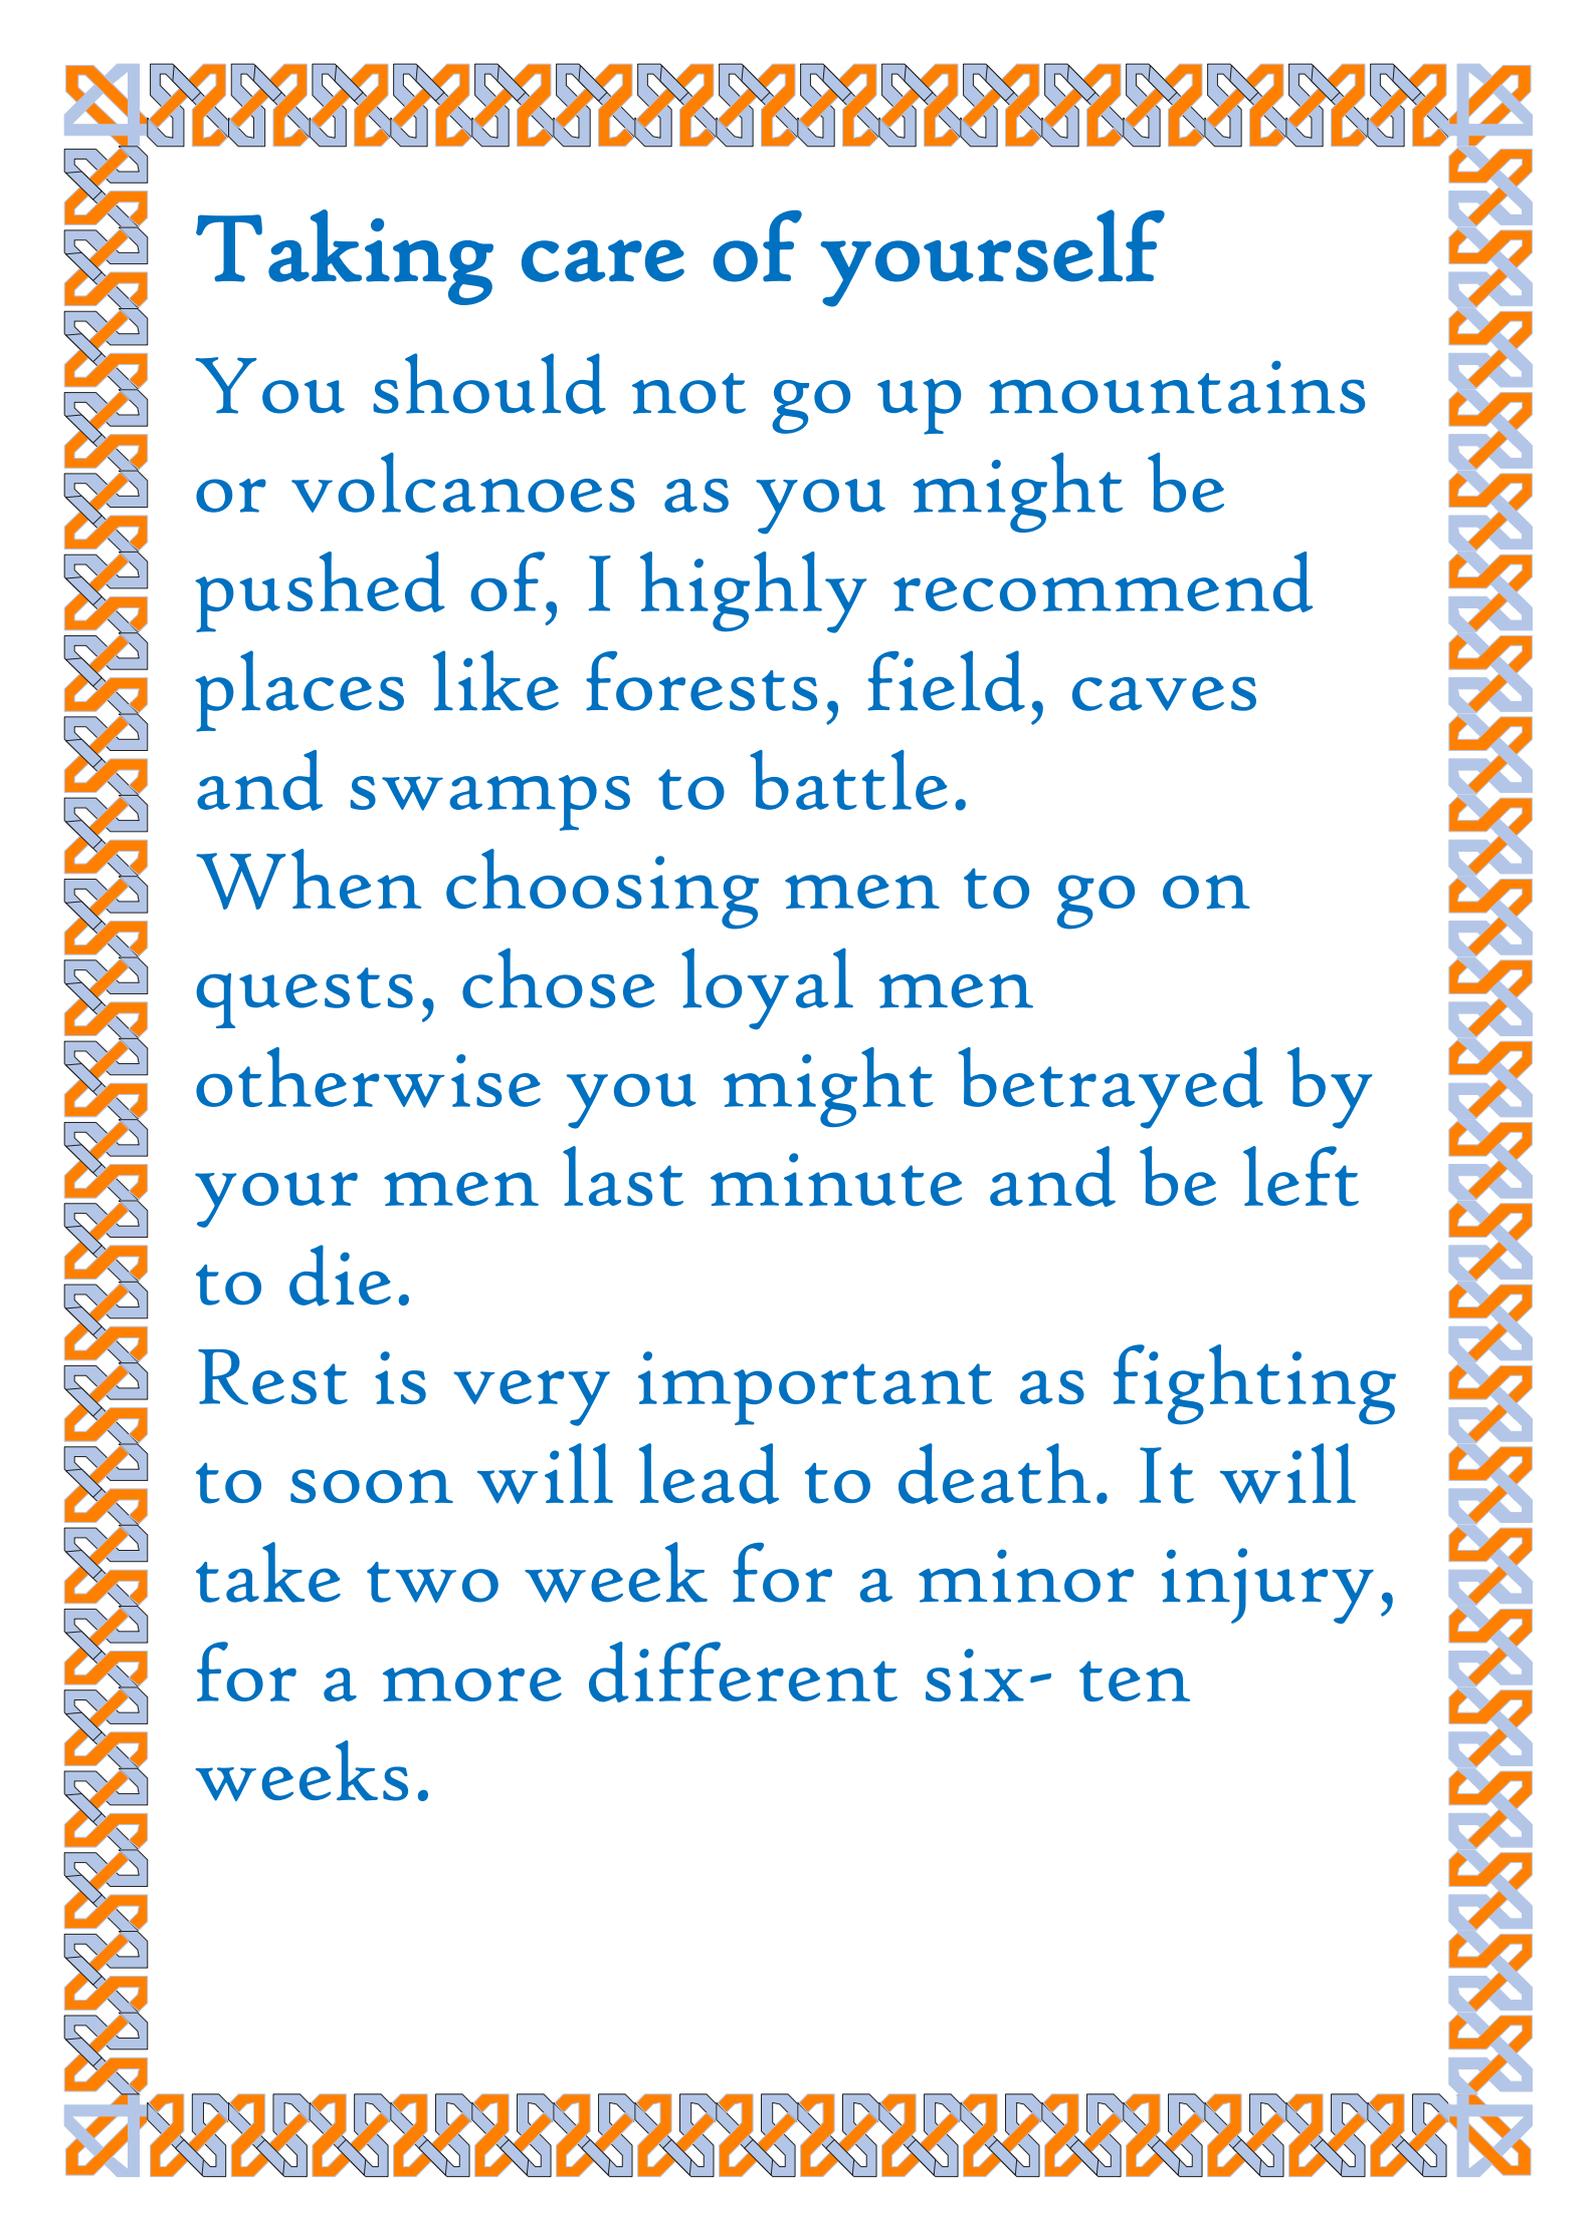

Beasts you may encounter

You might encounter hundreds of monsters so it is important to know which is which.

The three headed snake – with one bite the venom will kill you in two days, the venoms three headed snake is green with a hint of brown. Ogre- Ogres one eye, tough skin and huge weapons. There

weakness is there eye. If you throw a spear in to its eye, the ogre will die in the next hour.

Sea hags – sea hags are the most common monster of hundreds. They are all tall and have seaweed as hair. You shall find them in swamps or by the shore.

Taking care of yourself

You should not go up mountains or volcanoes as you might be pushed of, I highly recommend places like forests, field, caves and swamps to battle.

When choosing men to go on quests, chose loyal men otherwise you might betrayed by your men last minute and be left to die.

Rest is very important as fighting to soon will lead to death. It will take two week for a minor injury, for a more different six- ten weeks.

How to choose your battles and secure your rewards

To secure your promise

Option A - tell the thane or king say

“I will slay the best with all my might but if you don't keep your promise I will tell all the other monster slayers not to help you as they will not be reward”

Option B - beg until he gives it you if not kill him and take your reward and possible more.

Not all monsters are destroying villages, are they not worth fighting.

If they kill hundreds, destroying homes and strike fear in to people's life then they shall be slayed by a mighty hero.
