

# BEOWULF'S

## GUIDE TO MONSTER SLAYING

# Weaponry

It is reasonable to normally have weapons during monster slaughter .It is especially important to sharpen them on a daily basis and take amazing care of them .

# Armour

For this deadly mission you will also need armour to protect you from harm .It is mostly recommended (From me the best monster slayer in the kingdom) to have iron armour because of how strong and protective it is .

# Preparing for battle

When in battle you should be wearing suitable clothes if you don't want to get them stained because you will get a little bit of blood on your outfit.

## Strategy

It is sensible to also have a strategy for example distraction, be sneaky and then kill it (In any way you want).

## Beast you may encounter

It is very likely you will become face to face with vicious and horrific monsters that may have thick skin, sharp teeth they can also be very grumpy depending on their mood so you should watch out!

## Taking care of yourself

You should really take good care of yourself because if you're silly and not sensible you will end up killing yourself! So I suggest you take good care of yourself.

How to choose your  
battles and secure  
your rewards

You should make sure  
the king isn't lying to you  
about your reward and see  
if it's actually worth doing  
for the reward, and the  
reward has to be good.
