

**HOW TO
KILL A
MONSTER**

**BEOWULF'S
GUIDE**

WEAPONRY

Its fundamental to keep your weapons clean at all times as they will get covered in blood and rust up after a few battles. You must sharpen your weapons with the finest flint mined from the caves on the edge of Denmark finest village. It is important to keep your weapons locked in a chest or anywhere it can't be seen. Make sure you are experienced with a sword. It's recommended you should train every day. If your sword breaks come to Herot and get a new one.

Armour

For this gruesome quest your armour should be flexible as you will need to go in all different shapes and sizes. Your body armour has to be strong and defending from claws, jaws and swords. It should be forged from the finest house and cauldron your armour will last about a month so don't forget to get a new one.

Preparing for battle

You must be fit and to be fit you have to come to the battle course everyday by the time you've went round it once you have to run round it you will have a one chance only to write a letter to your family . if you're thinking you will have no food or drink your wrong little bit of wine and lots of water.

Strategy

We have a team choice of how to attack we have the choice of the hiding attack which is where the team hide in one group and sneak up on the beat or we have the choice of surprising the beast and kill it or the ambush attack were we charge at the beast and start to pick at it and my personal favourite the stealth attack were the team are low and sneaky.

Beasts you may encounter

Some of the terrifying monsters you will come across are the ninety sixty six eyed giant and the forty eight legged spider the four eyed

monkey and the most dreadful of all time the king DIPOLODOCOLUS.

Taking care of yourself

To take care of yourself you have to be good at listening god at staying hydrated and Fighting also taking care of your team mates.

How to choose your battles and securing the reward

Make sure you're not on our own when you are battling a beast and if there's a beast that looks fierce and stronger than you call in an army to help with the challenge. Also make sure it's worth killing the monster instead of killing little bugs. Make sure you hard work gets paid off with a reward.
