

MONSTER
SLAYING
GUIDE
NO. 1

If you want to be the best monster killer there is then take notice of this great guide it is the number one guide around.

Weapons

To start off you will have to get weapons, to protect yourself,

You will need everything sharp and pointy so you can pierce the horrible monsters skin to destroy him/her forever. Daggers are essential for taking the beast by surprise and they are small and easy to carry just the things looking for. Get them made by an elf in the depths below. Next you will need a very sharp and suitable sword that can be made by your local black smith with a very strong material called faset it is found in the bottom of a dragon's lair with his treasures and ask to make it as light as possible. Last but not least is the most

protective part of the weapons a shield, Design it the way you want but don't make to dull in the colours it will attract them to much. Make sure to add a big sharp spike on the outside of the shield so that can cause damage as well, you can find the right materials in a devils cellar.

Armour

Well you need protection in a fight so make sure you get some the best place to get some made is in a dragons cave where his goblins live they carve the best metal for the best warriors. The most important part of the set is the helmet because most of the monsters are very tall which means they aim for the taller parts of the person, the protection has to be flexible as well because you need to be able to get around like you haven't got any armour on.

Battle

It is important you know what you're doing when you enter the battle grounds so here some tips from me the best monster killer ever.

.always where armour

.never give up

.protect team mates as well as yourself

.be acrobatic your armour is flexible

.think about winning not losing

.be aware of your surroundings [anything could happen]

. Don't lose concentration

.Use a weapon if you don't have awesome strength

Those are my top tips

Strategh

You have to think about how you are going to attack the monster as well as everything else.

Think about taking the monster from behind [although they might have eyes in the back of their head] which in that case take them from somewhere else. Another thing to do is be camouflage in the same colour as the background near you. Which is regally green the beast will probably be in the wood or a swamp like most of my foes were [Grendel and his mum]. My best advice is to make sure they are concentrating on something else. And then take the monster by surprise /at the worst moment.

Beasts you may encounter

Many beasts are around these days so you need to know what beasts you could come across and how to defeat them here are some key profiles of monster and their worst weaknesses.

Grendel or family

.vile

Weakness = strength immortal power

Three headed dog

. Massive

Weakness = other monsters

Taking care of yourself

I know this is about killing but you need to know how to look after yourself first if you feel you can't do the job/you think it is too hard, then hire a warrior to fight the monster. But don't get the wrong person because they can scam you by putting up the price of the reward at the end of the job that can put you and your village's money at risk of not having enough that can really mess things up. Next is be protective it is important that you try and stan

alive instead of getting your head ripped off, it is a good idea. Don't try and fight a monster if it isn't worth fighting, and make sure it isn't a trap and there trying to bate you out. Don't fight in your own village unless you have to and the beast won't go anywhere else because you could ruin the village by setting fire to it or breaking things with a sword, people get really angry if you destroy their houses I found out. You also have to look after your diet and your body which equals in doing 400 pull ups a day and 200 press ups as well.

Well that's how to keep care of yourself it might come in handy if you do all the things.

Thank you for reading my guide to monster slaying I hope you liked it.
