

**The guide to
creepy
monster
slaying**

by Beowulf

Weaponry;

If you want to begin slaying monsters don't forget to practice and always keep your weapons.

Always everyday sharpen your sword after a battle.

If your sword brakes go to a blacksmith in the village

To get it fixed or put more strength in it .

Always clean your axe and wipe off all the on your axe .

Use all of your weapons wisely in battle, especially with a huge and strong monster

.

ARMOUR

You must have strong and fire Prof Armour, always look after your armour every day even in battle, but never give your armour to someone else .

You should clean your armour every morning and afternoon .

If it gets thrashed go to a blacksmith to help

.

Preparing for battle

You must work out 3 days a week and you must train 2 days a week so you could get ready for any battles .

Always eat healthy foods, never give up and do your best at all the thing you do every day.

Please take care of yourself and have faith in yourself when you are fighting monsters.

Strategy:

You must be really good at ambush and stealth/camouflage so you can sneak attack on any type of monsters that you must battle every day of a week.

Beasts you may encounter

Creepers, skeletons, pig man, ender dragon and a horrible sea hag some of

these beasts might have been related to recant battles with other terrible mobs

Taking Care of Yourself

You must always watch out for volcanoes, snakes and evil foes, but watch out if one of friends is actually a foe in disguise .You must separate each battle between villains, I would recommend separating it two and a halve weeks .

How to choose your battles and secure your rewards

Not all of the monsters are mean and scary, some are fantastic, and if you think you can't win just remember your training. If it is as large a dinosaur you secure your reward, but if it is as small as a mouse you probably won't get your reward.
